18E059 Making My Dream Car

During this family workshop, participants assemble a green-energy model car with a solar panel and a self-designed plastic propeller. Our science teacher explains the theory and our students assist the participants. After the workshop, participants would understand the responsibility of people in sustaining the society and the Earth. Besides, each family can take the self-assembled dream car (green-energy car) home as a souvenir.

Programme Type: Workshop / Experiment Class**Subject Area:** Sustaining @ The Earth**Photo Credit:** My school**Organised By:** SKH Li Ping Secondary School, in association with Hong Kong Science Museum
